Technical Skills

Java & Spring Framework

TypeScript & Node.js

Angular & React

MySQL & PostgreSQL

Git & GitHub

REST APIs & Docker

Languages

Portuguese: Native

English: Intermediate

Methodologies

- Scrum
- SOLID Principles
- Domain-Driven Design

Full-Stack Developer

🔲 [Portfolio](#)

Spring Framework, TypeScript, Node, RESTful APIs, Angular & React

> Passionate Full-Stack developer focused on creating robust and scalable solutions. Graduated with a Technical degree in Systems Development and currently pursuing a Technology degree in Multiplatform Software Development. I have knowledge in Java, Spring Framework, TypeScript, Node, Angular, React and modern software architectures. I seek to contribute with innovative teams in the development of high-quality enterprise systems.

🔲 Education

December 2024 - Completed

Technical in Systems Analysis and Development

ETEC Prof. Ilza Nascimento Pintus

Complete technical training in systems development, with focus on programming logic, databases and agile methodologies.

December 2027 - In Progress

Technology in Multiplatform Software Development

FATEC Prof. Francisco Moura

Higher education course focused on multiplatform development, software architecture and modern development technologies.

🔲 Professional Experience

2024 - Current

Junior Developer (Seeking Opportunities)

Technology Market

Developing personal and academic projects to improve Full-Stack development skills. Focused on Java, Spring Framework, TypeScript, Node, Angular, React and microservices architectures. Actively participating in developer communities and contributing to open source projects.

🔲 Featured Projects

PORTFOLIO

`ANGULAR` `TYPESCRIPT` `TAILWIND`

Personal portfolio developed with Angular and TypeScript, showcasing projects, skills and professional experiences. Modern and responsive interface with smooth animations and glassmorphism design. href="https://portfolio-git-master-leonardos-projects-ca06eb83.vercel.app/" class="project-link" target="_blank">View on GitHub →

SHOP API

`Java` `Spring Framework` `Hibernate` `JUnit` `MySQL`

Complete RESTful API for e-commerce with authentication, product management, shopping cart and order processing. Implementation of unit tests and OpenAPI documentation.

View on GitHub →

ErrorSquad Server

`Node.js` `Express.js` `JavaScript` `PostgreSQL`

Backend server for team project management application. Implementation of WebSockets for real-time communication and third-party services integration. href="https://github.com/ErrorSquad-ABP/ErrorSquad-Server" class="project-link" target="_blank">View on GitHub →

🔲 Certifications & Courses

English Course - Intermediate Level
ICBEU • January 2017 - December 2019

Spring Boot
Self-taught • 2024

TypeScript
Self-taught • 2025

Angular
Self-taught • 2025

Linux Terminal Fundamentals
Self-taught • 2024

⚡ Additional Skills

Software Architecture
Domain-Driven Design, SOLID, Clean Architecture

DevOps & Cloud
Google Cloud, Docker, CI/CD

Soft Skills
Teamwork, Communication, Problem Solving
