PROFESSIONAL SUMMARY

Junior Full Stack Developer with experience in ERP and web applications: REST APIs in C#/ASP.NET Core, SQL Server and PostgreSQL, and interfaces in Next.js, React and Angular. Grew from intern to junior developer in 6 months, delivering service order, billing and inventory modules, migrating the Sales Order (PDV) application from PHP to C# with Next.js, and integrating the ERP with production systems. In personal projects, I applied Clean Architecture/DDD, JWT, integration tests and CI. Looking for a web-focused team to work on both back end and front end.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL (T-SQL)
Front end: Next.js, React, Angular, HTML, CSS, Tailwind CSS
Back end: .NET, ASP.NET Core Web API, REST APIs, Entity Framework Core, LINQ, NestJS, FastAPI, JWT
Databases: SQL Server, PostgreSQL, MySQL, MariaDB, stored procedures
Architecture and quality: Clean Architecture, DDD, SOLID, integration tests (xUnit, Testcontainers), messaging (RabbitMQ)
DevOps and tools: Git, GitHub, GitHub Actions, Docker, Postman, Vercel, Visual Studio, VS Code
Methodologies: Scrum, Kanban

PROFESSIONAL EXPERIENCE

Junior Software Developer | ACTi Tecnologia e Sistemas de Informação
Mar/2026 – Present | São José dos Campos, SP, Brazil

- Completed the time-tracking application in C#/ASP.NET Core and Angular, from business-rule analysis to delivery and validation.
- Integrated the ERP with the Carga Máquina time-tracking system, connecting the data of both applications.
- Built service order, billing, inventory and time-tracking features, with data access through Entity Framework Core, SQL Server and stored procedures.
- Implemented REST APIs in C#/ASP.NET Core for system integrations and process automation, reducing manual work.
- Integrated web applications with legacy systems (including VB.NET) and maintained applications already in production.

Software Development Intern | ACTi Tecnologia e Sistemas de Informação
Sep/2025 – Mar/2026 | São José dos Campos, SP, Brazil

- Migrated the Sales Order (PDV) application from PHP to C#/ASP.NET Core with a Next.js front end, keeping compatibility and integration with the main ERP.
- Built and maintained web applications with ASP.NET, Next.js and SQL Server, applying Clean Architecture, componentization and Git versioning.
- Integrated front end and back end through RESTful APIs and secure authentication.
- Grew from intern to junior developer in 6 months.

PROJECTS

- **ArchFlow** (.NET 9, Next.js, PostgreSQL): agile management platform combining Scrum and Kanban, with DDD and JWT authentication via HttpOnly cookies. [Repository]
- **Marfim** (Next.js, TypeScript, Tailwind): e-commerce with a storefront (catalog, cart, checkout, account) and an admin panel for orders, inventory, payments and auditing, consuming the OrderCore API. [Repository]
- **Quantum CRM** (Next.js, NestJS, PostgreSQL): lead management for sales teams. Worked as Product Owner and software architect (requirements, DDD architecture and diagrams) and as a full stack developer at FATEC Jacareí.
- **OrderCore** (.NET 10, PostgreSQL, RabbitMQ, Docker): order API with inventory reservation under concurrency, idempotent checkout and Stripe payments, with integration tests (Testcontainers) and CI on GitHub Actions. [Repository]
- **CourseCore** (.NET 10, ASP.NET Core, PostgreSQL): modular white-label API for a course platform, with JWT, auditing, automated tests and CI. [Repository]
- **InboxIQ** (FastAPI, OpenAI, Next.js, AWS): email triage MVP with AI classification and suggested replies.

EDUCATION, LANGUAGES AND AVAILABILITY

Associate Degree in Multiplatform Software Development | Fatec Jacareí | 2025 – 2027 (in progress)
Technical Course in Systems Development | Etec | 2023 – 2024
Languages: Portuguese (native), English (intermediate)
Availability: remote; hybrid (São José dos Campos and São Paulo); on-site (São José dos Campos)
